DETAILED ACTION

1. The Applicant's amendment, filed 17 September 2008, has been received and entered into the record, respectfully and carefully considered.
2. As a result of the amendment, claim 2 is amended. Claim 6 is canceled. Claims 11-12 are newly added claims. Therefore, claims 1-5 and 7-12 have been examined.

Specification

3. As a result of submitting a copy of the NPL reference "HomePlug 1.0.1 Specification" and indicating this NPL reference is nonessential material, which can be incorporated by reference per 37 C.F.R. § 1.57 (d), the examiner withdraws the pending specification objection.

Claim Rejections - 35 USC § 112

4. As a result of the below authorized examiner's amendment by canceling claim 2 and claims 4-6, the examiner withdraws the pending claim rejections.

EXAMINER'S AMENDMENT

5. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee. Authorization for this examiner's amendment was given in a telephone interview with Mr. Justin R. Sauer (Registration No. 56,920) on 9 December 2008. The amendments are to further clarify the invention by canceling claims 1-5 and 7-10, amending claim 11 and adding dependent claims 13-

15. Please note newly added dependent claims 13-15 correspond to original claims 8-10. As per MPEP 713.04, a separate interview summary form is not provided because the content of the interview has been summarized herein.

IN THE CLAIMS:

This listing of claims will **replace** all prior versions, and listings, of claims in the application:

1-10. (Cancelled)

11. (Currently Amended) A method for adding a remote device to a logical network on a network medium, the method comprising:

transmitting a first broadcast message over the network medium, the first broadcast message having a first Set Network Encryption Key (SetNEK) request with a unique, temporary network encryption key (NEK) and being encrypted with a device encryption key (DEK) of the remote device;

transmitting a second broadcast message over the network medium, the second broadcast message requiring a first response from the remote device and being encrypted with the unique, temporary NEK;

determining a media access control (MAC) address of the remote device by receiving the first response and extracting the MAC address;

transmitting a second SetNEK request with a local NEK for the logical network to the remote device;

transmitting a unicast message directly to the remote device using the MAC address, the unicast message requiring a second response from the remote device and being encrypted with the local *NEK*; and

confirming that the remote device has been added to the logical network based on receipt of the second response;

wherein the network is a powerline network.

12. (Previously Presented) The method of Claim 11, wherein the second *SetNEK* request is transmitted directly to the remote device using the MAC address in another unicast message.

13. (New) The method of Claim 11, wherein the remote devices are implemented according to the HomePlug Powerline Alliance standard.

14. (New) The method of Claim 11, wherein the second broadcast message is a request statistics MAC Management Entry (MME) and the first response is a statistic response MME.

15. (New) The method of Claim 11 wherein the second broadcast message is a request channel estimation MME and the first response is a channel estimation response.

Reason for Allowance

6. The following is the Examiner's statement of reasons for allowance:

The prior art does not teach the limitations in independent claim 11. The closest prior art fails to disclose transmitting a second SetNEK request with a local NEK for the logical network to the remote device, transmitting a unicast message directly to the remote device using the MAC address, the unicast message requiring a second response from the remote device and being encrypted with the local NEK and confirming the remote device has been added to the logical network based on receipt of the second response in a powerline network environment and in combination with all other claim limitations in the claim.

Allowable Subject Matter

7. Claims 11-15 are allowed.
